| Covanta Energy | Methane Gas Engine | Methuen Construction | \$1.5 Million |

SCOPE OF SERVICES

- Equipment Set
- Underground Site Work
- Mechanical Construction
- Installation

PROJECT DESCRIPTION

Methuen Construction assembled and installed a methane gas engine at Covanta’s waste-to-energy facility in Haverhill, MA. The power generation engine is fueled by methane gas, a by-product of Covanta’s landfill. The generator can produce up to 2.5 megawatts of electricity for use on-site or sold to the New England power grid.
