Town of Wareham, MA

ENGINEER:

CDM

PROJECT VALUE:

\$21 Million

TECHNOLOGIES/MATERIALS:

Activated Sludge with Nitrogen and Phosphorous Removal

PROJECT HIGHLIGHTS:

The new treatment facility meets more stringent federal and state limits for wastewater effluents.

ADDITIONAL DETAILS

Methuen Construction was the General Contractor for this wastewater treatment facility upgrade and expansion that replaced outdated treatment technology with a biological and chemical Nitrogen and Phosphorous removal system. Methuen self-performed all significant civil and mechanical activities including excavation, yard piping, concrete work, carpentry, structural steel fabrication/erection, demolition, mechanical equipment installation, bypass pumping, process piping installation, stainless steel fabrication/installation, and chemical piping.
