

WESTFORD WATER TREATMENT FACILITY CONSTRUCTION

PROJECT INFO:

OWNER:

Town of Westford, MA

ENGINEER:

Dufresne-Henry

PROJECT VALUE:

\$11 Million

TECHNOLOGIES/MATERIALS:

Two water treatment plants with pressurized green sand filters; chemical feed systems, MIOX generators; Ultraviolet purification; Aeration towers; and supporting equipment and piping.

PROJECT HIGHLIGHTS:

Each water treatment plant treats up to 3-million gallons per day from the town's 8 wells.

ADDITIONAL DETAILS

Two Water Treatment Plants were constructed in Westford, MA: the 14,540 square foot Forge Village facility and the 11,230 square foot Nutting Road facility. Methuen Construction was the general contractor and self-performed site work, concrete, yard piping, structural steel, wood frame construction, equipment installation, process and chemical piping, and coordination of system startup.
