

NORTH BILLERICA ASBESTOS REMOVAL - NORTH BILLERICA, MA

PROJECT INFO:

OWNER:

Spincraft, North Billerica, MA

ENGINEER / ARCHITECT:

EnviroVantage (Asbestos Removal) / Terracon Consulting

PROJECT VALUE:

\$3.2 Million

TECHNOLOGIES/MATERIALS:

Concrete Slab Placement, Asbestos Removal

PROJECT HIGHLIGHTS:

The discovery of asbestos contaminated soil, required the development of a comprehensive removal plan

ADDITIONAL DETAILS

Methuen Construction was the general contractor for this project at Spincraft in North Billerica, MA. Initial scope was preparing an existing area to support a Carnaghi Vertical Turning Center, which Spincraft uses to create complex metal fabrications for the aerospace, defense, and energy industries. Work consisted of: demolition of a concrete floor slab, dewatering and excavation with engineered support in order to form and place a concrete foundation measuring 60'x55' inside an existing facility. Prior to starting construction, the soil was found to be contaminated with asbestos, which required the project team to develop a comprehensive plan to address the asbestos contamination.
