

MARLBOROUGH COMPLEX TREATMENT PLANT UPGRADE - MARLBOROUGH, MA

PROJECT INFO:

OWNER:

City of Marlborough, MA

ENGINEER:

CDM Smith

PROJECT VALUE:

\$48 Million

TECHNOLOGIES/MATERIALS:

Wastewater Treatment Plant Upgrade/Expansion

PROJECT HIGHLIGHTS:

The new WWTP meets National Pollutant Discharge Elimination System (NPDES) effluent permitting requirements

ADDITIONAL DETAILS

Methuen Construction was the General Contractor on this project which included improvements to the existing 5.5 mgd Wastewater Treatment Plant and construction of a Phosphorus removal system, necessary to meet effluent permit requirements. A significant portion of the work involved by-pass pumping, as well as temporary tie-ins & phasing as part of the Maintenance of Plant Operations program. Work was carefully planned and executed without interruption to the Marlborough Wastewater Treatment Plant, the existing Resident Drop-off facility, and the WeCare Composting operation.
