

CLINTON FILTRATION PLANT - CLINTON, MA

PROJECT INFO:

OWNER:

Town of Clinton, MA

ENGINEER:

Earth Tech

PROJECT VALUE:

\$11.6 Million

TECHNOLOGIES/MATERIALS:

Ground-up construction of new water treatment plant

PROJECT HIGHLIGHTS:

A coordinated effort between MC, the town, and the new design team corrected errors in the original design

ADDITIONAL DETAILS

Methuen was the General Contractor for the construction of this new Water Filtration Plant that presented multiple challenges for the project team. The first, and most significant, was overcoming serious errors made by others during the original design of the new facility. Methuen Construction worked closely with the new design team and the Town to make the needed revisions to the scope, construction schedule and equipment to ensure the completion of a quality project. The owner acknowledged Methuen's willingness to resolve issues in an "efficient, cost effective, and expeditious manner."
