

BANGOR BUTTERFLY VALVE REMOVAL AND REPLACEMENT - BANGOR, ME

PROJECT INFO:

OWNER:

City of Bangor, Maine

ENGINEER / ARCHITECT:

City of Bangor - Engineer / AECOM

PROJECT VALUE:

\$117,800

TECHNOLOGIES/MATERIALS:

Pump Station Butterfly Valve Replacement

PROJECT HIGHLIGHTS:

The work had to be completed during dry weather and off peak hours, with normal treatment plant operations uninterrupted.

ADDITIONAL DETAILS

This project involved the removal and replacement of an aging Butterfly Valve at the Kenduskeag Pump Station (KPS) at the Wastewater Treatment Plant (WWTP) in Bangor, Maine. Additionally, Methuen Industrial Services replaced existing electrical work and wiring, plus the testing of all equipment and electrical components. This was a critical project for Bangor since the Kenduskeag Pump Station takes wastewater from approximately 2/3 of the City.
