

MIDDLEBOROUGH WATER POLLUTION CONTROL UPGRADE - MIDDLEBOROUGH, MA

PROJECT INFO:

OWNER:

Town of Middleborough, MA

ENGINEER:

Wright Pierce

PROJECT VALUE:

\$ 21 Million

TECHNOLOGIES/MATERIALS:

Water pollution control equipment for phosphorous and nitrogen removal

PROJECT HIGHLIGHTS:

These comprehensive improvements allow Middleborough to meet new stringent federal and state standards

ADDITIONAL DETAILS

Methuen Construction is the general contractor for this project which consists of comprehensive upgrades to the Town of Middleborough Water Pollution Control Facility. This improvement project is required to meet the new stringent standards set by the Environmental Protection Agency and the Department of Environmental Protection to lower phosphorous and nitrogen levels discharged into the Nemasket River. Included in this upgrade is a new 1,500-square-foot control building, a control room, new plant entrance road for better truck access, a maintenance garage and a new tertiary building.
