

MBTA STATION PARKING GARAGE - SALEM, MA

PROJECT INFO:

OWNER:

Massachusetts Bay Transportation Authority (MBTA)

ARCHITECT:

Fenwick McCredie Architecture

PROJECT VALUE:

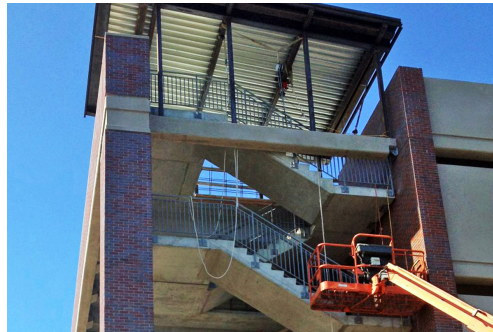

\$1.5 Million

TECHNOLOGIES/MATERIALS:

Structural Steel & Miscellaneous Metals

PROJECT HIGHLIGHTS:

Project required the fabrication and installation of all metals for the MBTA parking garage in Salem, MA

ADDITIONAL DETAILS

The project consisted of the installation of fabrications for the construction of a new 5 story parking garage at the MBTA station in Salem, MA. The company provided the installation of all fabrications including the stair towers, dual elevator shafts, pedestrian bridge with dual cantilever roofs, and other special roof features on the main structure. The elevator shaft and the pedestrian bridge were pre-fabricated at the Plaistow fabrication shop and installed on site.
