

FALMOUTH WATER TREATMENT CONTROL SYSTEM - FALMOUTH, MA

PROJECT INFO:

OWNER:

Town of Falmouth, MA

ENGINEER / ARCHITECT:

CH2M Hill, Inc / Tata & Howard

PROJECT VALUE:

Confidential

TECHNOLOGIES/MATERIALS:

Water Treatment Plant Analyzer and Modular Control Panels

PROJECT HIGHLIGHTS:

The automated control system was a key component of the new Long Pond Water Treatment Plant in Falmouth, MA

ADDITIONAL DETAILS

The Methuen Industrial Services Group procured and installed an automated control system at the Long Pond Water Treatment Plan. The automated control system allows the entire water treatment plant to be run from one central location. Since monitoring is 24/7, it allows the Town of Falmouth to ensure its residents receive clean, safe water with little or no interruption. The Town of Falmouth gets 60% of its water from Long Pond.
