

LOWELL HYDRO DAM TUNNEL COLLAPSE REPAIR - LOWELL, MA

PROJECT INFO:

OWNER:

Enel Green Power North America

ENGINEER:

Methuen Construction

PROJECT VALUE:

\$810,630.00

TECHNOLOGIES/MATERIALS:

Concrete and stone repairs in the Boott Mills Tunnels

PROJECT HIGHLIGHTS:

Special safety procedures were required for work in the collapsed tunnels

ADDITIONAL DETAILS

Before beginning any work to repair the tunnels leading to the Enel Hydro turbines, the sections of the collapsed tunnels had to be shored up, which required special safety procedures. This project was in two phases, first to provide temporary repairs to the collapsed tunnels, and secondly to provide a permanent solution for the tunnels. Methuen Industrial Services provided the skills and experience to address this serious situation.
