

COTUIT PUMP STATION IMPROVEMENTS & UPGRADES - COTUIT, MA

PROJECT INFO:

OWNER:

Cotuit Fire District Water Department

ENGINEER:

Tata & Howard

PROJECT VALUE:

\$401,859.00

PROJECT HIGHLIGHTS:

Installing a permanent sodium hydro-chloride chemical feed system at all five of Cotuit's pump stations is a key component of this project

ADDITIONAL DETAILS

The project consists of cleaning and redevelopment of the two gravel packed wells at Pump Station One and Pump Station Two at the Cotuit Fire District water treatment system in Cotuit, MA. This project provides pump discharge piping upgrades at Station One, and installs a permanent sodium hydro-chloride chemical feed system at each of Cotuit's five pump stations. All five pump station upgrades include chemical day tanks, metering pumps, and associated piping. The work also includes the electrical, instrumentation, and controls for the pump stations.
