

NORTON WATER TREATMENT PLANT - NORTON, MA

PROJECT INFO:

OWNER:

Town of Norton, MA

ENGINEER:

Weston & Sampson

PROJECT VALUE:

\$9.2 Million

TECHNOLOGIES/MATERIALS:

2.5 mgd pressure filtration water treatment plant

PROJECT HIGHLIGHTS:

The new water treatment plant construction uses directional drilling of the raw water intake lines from the three wells that feed the new water treatment plant.

ADDITIONAL DETAILS

The scope of work includes the construction of a 2.5 mgd pressure filtration water treatment plant (WTP) that removes iron and manganese from the water of the three wells that provide the water for the Town of Norton.. Additionally, the project includes two packaged standby generators and three additional water filtration tanks. The project also includes directional drilling of the raw water intakes and improvements to the three wells.
