

EVERETT, MA - EMISSIONS CONTROL EQUIPMENT SUPPORT

PROJECT INFO:

OWNER:

Schnitzer Steel Industries

ENGINEER:

Waldron Engineering

PROJECT VALUE:

\$8.0 Million

TECHNOLOGY / SCOPE:

Steel framed enclosures and equipment installations

PROJECT HIGHLIGHTS:

The project supports the new emissions control system at the steel recycling facility

ADDITIONAL DETAILS

A new emissions control system is being installed at the Schnitzer Steel Industries scrap metal shredding facility in Everett, MA. Methuen Construction is providing the labor, materials, equipment, tools and supplies to install steel framed enclosures, support structures, procured equipment and associated architectural, mechanical, and electrical work in support of the shredder emissions control project.
