

EVERETT 3DS & CRS SYSTEMS - EVERETT, MA

PROJECT INFO:

OWNER:

Schnitzer Northeast

ENGINEER:

Woodard & Curran

PROJECT VALUE:

Confidential

TECHNOLOGIES/MATERIALS:

3DS and CRS Systems

PROJECT HIGHLIGHTS:

The installation of the new 3DS System and Copper Recover System requires an expansion to the building and the mechanical and electrical utilities.

ADDITIONAL DETAILS

Methuen Construction was awarded a contract to demolish the existing non-commissioned equipment and install a new 3DS System as well as a new Copper Recovery System (CRS), and a new water treatment system at the Everett, MA facility. The project also includes replacing select screening equipment, additional eddy current systems, and related conveyors. The installation of the new systems also requires an expansion to the building and the mechanical and electrical utilities.
