This project upgrades the wastewater treatment system and improves both the Souhegan and Thornton's Ferry Pump Stations.

ADDITIONAL DETAILS

Methuen Construction is upgrading the Town of Merrimack Wastewater Treatment Facility, Souhegan Pump Station and Thornton's Ferry Pump Station in Merrimack, NH. Work on the Wastewater Treatment Facility includes renovating the main pump station with new influent pumps, piping/valves, slide gates, and monorails/hoists and upgrades to the building, control and electric systems. The Souhegan Pump Station and Thornton's Ferry Pump Station will both be renovated with new influent pumps, piping/valves, stop and slide gates, monorails/hoists, and channel grinder. Relining of the existing force main, upgrades to the building, control and electrical systems are also included in the scope of work for both pump stations.
