OWNER:

Portsmouth Naval Shipyard

PROJECT VALUE:

Confidential

TECHNOLOGIES/MATERIALS:

Clean Room, HEPA Filters, Movable Roofs, Specialty Bridge Cranes, Modular Building Construction

PROJECT HIGHLIGHTS:

The project consists of multiple enclosures totaling 23,100 sqft to be fabricated and installed at the Portsmouth Naval Shipyard in Kittery, ME.

ADDITIONAL DETAILS

The purpose of the Dry Dock #2 complex project is to fabricate and install multiple enclosures totaling approximately 23,100 sqft at the Portsmouth Naval Shipyard in Kittery, ME. A 21,500 sqft permanently installed enclosure consists of two towers, storage areas, railcar access, multiple high and low bay work areas, three bridge cranes, movable roofs, access control, and all associated HVAC, mechanical, electrical, alarm, controls, and communication systems. A 1,600 sqft modular relocatable enclosure consists of two support towers supporting two enclosure components with a tower, a bridge crane, and movable roofs.
