ATS Chester Engineers

PROJECT VALUE:

\$853,000

TECHNOLOGY / SCOPE:

Dust Suppression System

PROJECT HIGHLIGHTS:

Work had to be completed while the facility operated 7 days a week, 24 hours per day

ADDITIONAL DETAILS

Methuen Construction was the General Contractor on this project at a major East coast coal transfer facility for the CSX transportation company. Methuen coordinated and managed the installation of the dust suppression piping, insulation, and electrical work.

Construction of this project required very timely planning, scheduling, coordination, and execution of the work within the coal transfer facility, which operated seven days per week and twenty-four hours per day.
