

TAUNTON EQUALIZATION TANK BUILD - TAUNTON, MA

PROJECT INFO:

OWNER:

Tribe Foods

ENGINEER:

Permastore Limited UK

PROJECT VALUE:

Confidential

TECHNOLOGIES/MATERIALS:

Glass-fused-to-steel 60,000 gallon equalization tank

PROJECT HIGHLIGHTS:

The build design allows for the tank/roof to be constructed at ground level and then jacked up, allowing the next section to be built underneath.

ADDITIONAL DETAILS

The Methuen Construction crew of five skilled technicians worked through adverse December conditions, completing the tank build in nine workdays to meet the customer's schedule. With over 4,500 bolts and 125,000 cubic centimeters of special sealant to apply, the crew worked diligently to keep the panel surfaces free of frost and moisture to assure perfect connections and a quality product. The build design allows for the tank/roof to be constructed at ground level and then jacked up as the build continues. This allows for a fast and safe construction.
