

ROCKPORT SEWER PUMP STATION UPGRADE - ROCKPORT, MA

PROJECT INFO:

OWNER:

Town of Rockport, MA

ENGINEER:

Weston & Sampson

PROJECT VALUE:

\$224,865

TECHNOLOGIES/MATERIALS:

Complete Pump Station Overhaul

PROJECT HIGHLIGHTS:

During pre-construction damage to a wet well was discovered, which was repaired allowing the project to complete on time.

ADDITIONAL DETAILS

The Industrial Services Group was contracted to completely overhaul a sewer pump station that posed a leakage and erosion threat to an adjacent beach. The Industrial Services Group was responsible for removal of the old equipment, setting/installation of the new pumps and testing of all equipment and connections. During preparation of the site, damage to the wet well was discovered that allowed groundwater to infiltrate the wet well and the sewer system. The damage was repaired, preventing the groundwater leakage and allowing the pump installation to proceed.
